

Beginning Teacher Support and Assessment

Credential Renewal Codes (Credential Information Alert 03-01)

1) Public Search for credential information:

<https://teachercred.ctc.ca.gov/teachers/PublicSearchProxy>

By entering the complete first and last name of the participating teacher, and knowing the middle name, you will almost always be able to view a copy of the teacher's credential. This copy will have the exact credential renewal codes describing what the teacher must complete to earn the Professional Clear Credential.

2) First Renewal Code: Is intended to provide the full text for each of the three renewal options available. The candidate must meet **one** of the three options.

R14R California- Ryan Trained Teachers **R14D** Out-of-state trained teachers
R14S California-SB 2042 Trained Teachers

To view the exact wording of the R14R and R14D, see page 4 of CIA 03-01

Second Renewal Code:

R14T (both California and out-of-state trained teachers) lists the requirements for the specific teacher. See page 4 of CIA 03-01 for a full list of possible requirements.

Careful reading of the R14T section will show the exact requirements for the participating teacher.

For the out-of-state teacher **ONLY**, the CCTC will have indicated if the teacher has already satisfied the requirements related to advance computer-based technology, health education, or special education. If the out-of-state teacher has only one or two of the three content areas listed, the teacher has demonstrated equivalent work in the content area(s). The Induction Program should waive the requirements for the appropriate standard(s) {16 Technology, 18 Health or 20 Special education}, for this specific out-of-state teacher.

The new CCTC computer system, mentioned in CIA 03-01, that will replace the current CAS system was not in place in August 2003. Once this new system is operational, the credential document will list just the specific requirements for the individual teacher.
